The U.S. Coast Guard Navigation Center (NAVCEN) is the official government source of information for civil users of the Global Positioning System (GPS). The Navigation information Service (NIS) is available 24 hours a day, 7 days a week, for all Radio Navigation and maritime related needs via phone, fax or e-mail. The NIS provides users the ability to access real time or archived GPS, NDGPS, DGPS and LNM information at <http://www.navcen.uscg.gov> as well as subscribe to an automated list service which enables users to receive GPS status messages and Notice to NAVSTAR Users (NANU) messages via direct Internet e-mail.

The NAVCEN also disseminates GPS, DGPS safety advisory broadcasts messages through USCG broadcast stations utilizing VHF-FM voice, HS-SSB voice, and NAVTEX broadcasts. The broadcasts provide the GPS and DGPS user in the marine environment with the current status of the navigation systems, as well as any planned/unplanned system outages that could affect GPS and DGPS navigational accuracy.

To comment on any of these services or ask questions about the service offered, contact NAVCEN at:

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

HURRICANE SEASON

The hurricane season extends from June 1st through November 30th. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed. For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

- (a) HURRICANE WATCH - a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and
- (b) HURRICANE WARNING - which indicate that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricane and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available. Port Hurricane Conditions are set by the COTP and will change as the threat of severe weather increases, or as storm(s) approach a specific COTP Area of Responsibility. For COTP specific Port Hurricane Conditions, you should review information provided under Port Directory tab of <http://homeport.uscg.mil>

CONDITION 4 - Hurricane Seasonal Alert. 01 June-30 November; port status: open.

CONDITION WHISKEY - Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 72 hours; port status: open.

CONDITION X-RAY - Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 48 hours; port status: open.

CONDITION YANKEE - Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 24 hours; port status: restricted; vessel/facility control measures in effect.

CONDITION ZULU - Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 12 hours; port status: closed to all vessel traffic and waterside activities except for activities approved by the COTP.

Drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of Gale Force winds of 34 knots or greater. Extended closure periods may be authorized up to 8 hours prior to arrival of Gale Force winds to facilitate evacuation of land traffic. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of Gale Force winds.

RADIOTELEPHONE DISTRESS WATCHKEEPING

Mariners are advised that calls to the Coast Guard on the international radiotelephone distress frequency 2182 kHz may not be reliably received by the Coast Guard. Areas where maritime broadcasts on 2670 kHz are being received satisfactorily by mariners should not be affected. Similarly, mariners using high frequency (HF) radiotelephones equipped with digital selective calling (DSC) capable of operating on the 4, 6, 8, 12 and 16 MHz distress frequencies should not be affected. Coast Guard watch keeping services on these HF radiotelephone and DSC distress frequencies are posted at <http://www.navcen.uscg.gov/?pageName=cgcommsCall>. Mariners who receive a distress alert or call that has not been acknowledged by the Coast Guard are asked to assist if possible and advise the nearest Coast Guard unit using whatever means is practicable.

SEACOAST-FLORIDA-PALM SHORES-WEST PALM BEACH-LAKE WORTH INLET: Semi-Submersible Testing

Lockheed Martin – Riviera Beach in conjunction with the United States Navy will be conducting offshore testing of an unmanned, remotely piloted, semi-submersible vehicle 1 to 5 miles offshore from the Lake Worth Inlet to Boynton Beach Inlet. Operations will take place beginning January 1, 2012 and ending December 31, 2012. The Lockheed Martin RHIB and Sea Tow RHIB vessels will support the semi-submersible and will be in constant radio contact with the operations crew and equipped with a remote kill switch. They will also be monitoring VHF channel 16. Mariners are advised to stay clear of the RHIB boats, the semi-submersible vehicle and posted dive flags by at least 200 yards. For further information please contact Sea Ops Division, Mr. Donny Jones 561-494-2245.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

GEORGIA AND FLORIDA – CUMBERLAND SOUND – FERNANDINA HARBOR TO KINGS BAY – ST MARYS RIVER SWINGBRIDGE: Bridge Repairs.

Parsons Brinckerhoff has advised this office that they have been selected as the consulting firm for Florida Department of Transportation District 2's, US 17/St. Mary's River Swingbridge repairs across the St Mary's River, Nassua County, Florida. They have advised this office that this bridge is currently unable to operate per 33 CFR 117.329 which states that this bridge will open on signal if at least 48 hours notice is given. The anticipated repairs will place this bridge back into full operation. The exact dates and times for the repairs will be

published in future Local Notice to Mariners. Parson Brinckerhoff is expecting to restrict one-half of the navigable channels during these repairs. This action should not impede navigation as there will be one channel available under this swingbridge at all time.

The Skidaway Narrows (Diamond Causeway/SR 204) Bridge across the Atlantic Intracoastal Waterway mile 592.8, Chatham County, Georgia is being replaced. United Contractor, LLC has advised the Coast Guard Captain of the Port Savannah that they will be placing floating equipment in Skidaway Narrows at this bridge location. Two construction barges and the pushboat PYTHON will be working adjacent to the bascule bridge on the north side, south of the power lines. During daylight hours the navigable waterway will be restricted to 70 feet. Construction operations, during the evenings, will not restrict the navigable waterway. Construction will be ongoing until April 2, 2013. Mariners are urged to exercise caution and transit at their slowest safe speed. Please contact the pushboat PYTHON on marine VHF radio channel 9 for on-scene coordination, communication and passing arrangements. For further information contact the U.S. Coast Guard MSU Savannah at (912) 247-0073.

The contractor will be removing the old bascule bridge through September 2012. The existing drawbridge will remain operational until removal. There are no changes to vertical and horizontal clearances. The new fixed Diamond Causeway Bridge will have a vertical clearance of 65 feet and a horizontal clearance of 180 feet.

FLORIDA - GULF INTRACOASTAL WATERWAY - TAMPA BAY TO ANCLOTE - PINELLAS BAYWAY "STRUCTURE E" (TERRA VERDE) BRIDGE: Bridge Construction.

The Pinellas Bayway "Structure E" (Terra Verde) Bridge across Gulf Intracoastal Waterway, St. Petersburg, Pinellas County, Florida is being repaired. This project started on May 14, 2012 is expected to be completed by April 1, 2013. Due to the nature of these repairs M&J Construction will have floating equipment in the area and has assured the Coast Guard that this equipment can be moved outside the channel limits upon request. Any delays should be reported directly to the Coast Guard at 305-415-6744 and a follow up email should be sent to Michael.b.lieberum@uscg.mil with a copy to Jessica.r.hopkins@uscg.mil.

The Pinellas Bayway "Structure E" (Terra Verde) Bridge across Gulf Intracoastal Waterway, St. Petersburg, Pinellas County, Florida will be on single-leaf operations from 7:00 a.m. on September 24, 2012 through 5:00 p.m. on October 11, 2012 and from 7:00 a.m. October 15, 2012 through 5:00 pm. October 31, 2012. During this time no double-leaf operations will be available due to machinery removal and replacement.

Mariners are cautioned that a scaffolding system will be placed on this bridge outside the navigable channel limits which will reduce the vertical clearance on the approaches. Mariners are requested to transit through the main navigable channel during these repairs.
